Al Simmons® was a man split by his devotion to his beloved wife, Wanda, and his dedication to his job. Unfortunately, his job was as a professional assassin working for Jason Wynn™, the corrupt head of the United States Security Group. Somehow, Simmons managed to balance these two contradictory drives for years, but eventually his compassion for others made him distrust and question his orders. Before he knew what was happening, Wynn had him torched to death by a fellow operative.

But Al Simmons came back – he made a deal with Malebolgia®, a master of Hell; a deal which has made his death far more complicated than his life ever was. For now he is a Hellspawn™, destined to be a general in Hell's army when the Apocalypse comes, destined even to bring about the Apocalypse no matter how desperately he tries to escape from his future.

On a decrepit rooftop above New York City's forgotten back streets, Spawn reflects on the decisions he made in life that condemned him to this wretched existence. As he bemoans his fate, a violently green shaft of light strikes down from the sky, sending a shockwave of incandescent energy flooding through the city. To Spawn's surprise, the people and structures of New York don't seem to be affected by this unexpected impact. But when the wall of green fire hits Spawn he feels his symbiotic costume writhe in pain, and he is hurled backwards. Only by grabbing a nearby water tower does he avoid being helplessly cast down into the streets below...

Spawn recovers from the blast, his eyes narrowing as he contemplates the implications of this supernatural assault...

Little does he realize that a chance to reverse his ill fortunes has been laid before him ...

See page 19 for more information on how to save.

WINNING THE GAME

The countdown to Armageddon has begun, and Spawn has no desire to submit to an assured eternity of damnation. He will fight back by dedicating himself to preventing the horrific conclusion of the plan that began with the green beam he witnessed in the sky.

His quest will lead him inexorably through worlds both natural and supernatural, past foes both hellish and heavenly, via a series of missions that each unlock a part of the Grand Design. If Spawn survives, he may even find a way to end his suffering forever...

COMPLETING THE GAME 100%

To experience **SPAWN®: ARMAGEDDON** in its entirety, Spawn must accomplish the following tasks:

- Complete the game in all Difficulty Levels - Easy, Normal and Hard.
- Collect all of the Comic Book Covers.
- Defeat enough enemies to unlock the entire Encyclopedia.

MISSIONS

The game is divided into a series of missions, each of which unravels part of the mystery of the green beam that struck in the center of New York City. Collect the fiery Spawn icon to end a mission.

Demons are running freely through the back streets of Rat City, the slums of New York. Spawn will begin his quest by tracking these demons to their source - where an unexpected development will turn his twisted world upside-down...

GAME AREAS

THE BOWERY

The Bowery is the darkest, dankest area of New York City: it is here that Spawn has found a new home, among the detritus of human life. He shares the back alleys with the homeless riff-raff of the city and the vermin that feeds on humanity's castaways and give the area its nickname – Rat City.

Spawn has claimed this area as his own, but when hordes of lesser demons begin to scurry through the alleyways, he sets out to put them in their place...

WAREHOUSE DISTRICT

Al Simmons once worked for Jason Wynn, a man with more secrets and hidden agendas than his superiors even suspect. For his own protection, Wynn keeps a private army of dedicated security guards equipped with the latest in military technology. These weapons arrive at regular intervals and are stored in nondescript, yet heavily defended, warehouses on the coast of Manhattan Island.

When faced with innumerable demonic adversaries, Spawn thinks back on Al Simmons' military knowledge, and decides to arm himself with some of Jason's latest deliveries...

GAME AREAS

CENTRAL BUSINESS DISTRICT

The glitzier areas of New York are characterized by their shining shop windows, towering office blocks, theatres and teeming citizens. However, demonic influence is spreading throughout the city, stemming such bright happiness – time is running out for Spawn to stop the spread of Malebolgia's army before it engulfs the entire world!

Now the streets are filled with a paranoid foreboding: the building façades are gloomy and overbearing. Demonic cackles herald an era of human subjugation at the hands of hellish masters – and yet the golden spire that is Angel Tower looks down upon all of this with an unearthly detachment. Can Spawn find the secrets behind the Angels' cold, uncaring surveillance?

SUBWAY

As if the filth of the Bowery was not enough, Spawn is forced into the abandoned subway system deep below New York's current thundering railways. The dark tunnels hide many secrets, guarded by loathsome creatures that try to suck Spawn's very life-essence away. But his determined nature must pull him through intact if he is ever to find the many answers he seeks...

GAME AREAS

CENTRAL PARK

Spawn finds that the center of Hellish activity in New York is in Central Park. The natural haven has become a twisted nightmare of grasping branches and demonic infection. The darkness between the trees has eyes, and they watch with malice as Spawn uncovers a plot even more diabolical than he could ever have feared...

HELL

In desperation, Spawn finally returns to the land of his terrible rebirth. There, surrounded by jealous Souls that are forever tormented by their sins, he confronts his creator and nemesis in a battle of the wills that could rewrite his entire future...

ANGEL SPACE STATION

Spawn finds himself in the last place he ever imagined he would see with his own eyes. But here he will find redemption - or eternal damnation...

GAME DISPLAY

HEALTH

Spawn's Health Bar decreases when he takes damage. When the Health Bar is entirely depleted, Spawn is removed from the plane of Earth and Malebolgia chooses another worthy Soul to lead his Hellish army.

At this point, select **TRY AGAIN** to be granted another chance to try the current mission from the beginning, or **QUIT** to exit the current game and return to the Main Menu.

NECROPLASM

Necroplasm is the energy source that allows Spawn to use his Hell Powers. Each Hell Power uses up a specific amount of Necroplasm. When the Necroplasm Bar is depleted, Spawn cannot use his Hell Powers unless his energy is replenished.

WEAPON

The active weapon is displayed in the upper left corner of the screen. Spawn will unlock many weapons as he progresses through the game.

The health of the currently targeted enemy is located in the lower left corner of the screen. When this reaches zero, the enemy is destroyed.

The enemy's name appears above the Enemy Health Bar.

SOULS

When enemies die, they release their tortured Souls in the form of blue globes. Spawn can collect these Souls and trade them at the Intermission Screen for weapon upgrades or ammo for any of the weapons he has acquired. He can also use Souls to increase his maximum Health and Necroplasm levels.

The Continue Saved Game screen lists up to eight saved games. Select the Mission to load, and press the button to load the saved game. The Intermission Screen for the mission loaded appears, and play resumes.

WEAPONS

AGONY

The physical manifestation of Spawn's own tormented Soul. By concentrating on his own rage and utilizing his cape as a focal point, Spawn can summon this weapon and utilize its blades to cut through practically anything. While capable of incredible damage, Agony can only be wielded by Spawn, as his direct contact channels its existence into solid form. Agony has the tendency to absorb the blood of Spawn's enemies into itself. Spawn often wonders if this trait will have a prolonged effect on him after he dismisses the axe.

CHAINS

Two glistening metallic chains bolt out at Spawn's enemies and attack with snakelike accuracy and speed. These chains can be used singly or together. Together, they can hold an enemy in the air with incredible prehensile strength.

The Chains are Spawn's default long range weapon, since they never run out of ammunition. They can also be used to pull Spawn up to otherwise inaccessible places - when a Chain Icon lights up yellow, press the L1 button to pull Spawn over to it.

SAWED OFF SHOTGUN

One of Spawn's most devastating close range weapons - a double-barreled, sawn-off, breech loading shotgun. Pulling the trigger looses two barrels of wrath and destruction. Capable of tremendous damage at close range, the weapon loses much of its effectiveness at further distances.

SEMI-AUTO PISTOLS

A pair of high caliber, armor-piercing pistols. Developed by a company under Jason Wynn's influence, these very effective weapons were intended for use against

Spawn and other Hell-born creatures. Wholly capable of great damage, these weapons have been produced in order to outfit Wynn's personal strike force in the event of a confrontation with the Hellspawn.

WEAPONS

MADCAP SUB-MACHINE GUN

A set of sub-machine guns that utilize a large caliber of bullet. The design of the weapon allows for higher accuracy at farther distances while the ammo maintains a high armor-piercing potential. Intended for use against lightly armored vehicles and armored personnel, these sub-machine guns excel in both aspects. The guns are known for the bulky clip attached to their underside.

MINI-GUN

Using multiple, spinning, air-cooled barrels, the Mini-gun is used as a support weapon capable of tearing through entire units of enemies. This particular set of guns has been highly modified - with sufficient support, the user can carry the weapon with one hand. (Developments in muscular enhancements have coincided with the development of this weapon.) Once the trigger is pressed and held, the Mini-guns power up and begin to spin rapidly. A second later they begin to fire at an incredible rate. This short initial spinning period is necessary to keep the weapons from overheating, however it can pose problems for the user if an instant response is required.

BRIMSTONE CANNON

The Brimstone Cannon was developed by Angel Scientists to use Necroplasm extracted from captured demons as a power source and projectile. Continued use of Necroplasm was found to gradually mutate the weapon until it became a demon itself, so the Scientists developed replaceable cartridges to hold the mutagenic material and extend the life of the cannon. Spawn can wield two Brimstone Cannons simultaneously.

WEAPONS

BURST MISSILE LAUNCHER

Considered to be the pinnacle of development in anti-tank, support and air-to-ground weaponry, the Burst Fire Missile Launcher is indeed a force to be reckoned with. While boasting a triple-barrel launching assembly, the weapon can still be fired from the hip with no reduction in accuracy. Once a target has been confirmed, the user simply depresses the trigger, and with each cartridge the launcher fires three missiles in succession at its intended target. Once a missile has made contact with any solid object, it explodes, damaging everything within a radius.

INFERNO CANNON

Another weapon developed by Angel Scientists, the Inferno Cannon is the most incredibly powerful hand held weapon Spawn will find. The Necroplasm that powers the Inferno Cannon has almost completely mutated the weapon until it resembles a bag of bones and guts, but don't let its organic appearance fool you – the Inferno Cannon is capable of tearing apart almost any adversary.

The Inferno Cannon fires a projectile that takes several seconds to charge up to its full power. Press and hold the  button to build up charge. The shot can be released at any time, but maximum damage will only occur at full charge.

HELL POWERS

Spawn has five different Hell Powers that he can use in the game. Each power has a different effect, and uses a different amount of Necroplasm.

NECROPLASM BALL

These are glowing green spheres of Hell Energy that explode on contact. They will intelligently track a locked-on target.

NECROPLASM BEAM

This is a rapidly moving blast of Necroplasm that can blow through multiple targets, causing a lot of damage. The Beam is so called because its projectile moves so quickly that it forms a beam.

DEMONIC FURY

This power summons up Hell's fury on a single target, who is attacked by nightmarish horrors: manifestations of Spawn's pure anger. This causes a lot of damage, and incapacitates the victim for a short time.

HELL SPEED

This power makes Spawn move at superhuman speeds to increase the amount of damage he can cause in the same amount of 'time'. Spawn will appear to move at normal speeds while everything else slows down. Hit the Hell Power button once to activate the effect, and again to deactivate it. Beware – Spawn's Necroplasm will be continuously drained.

NECROSHIELD

This shields Spawn's body, reducing damage done to him while the power lasts. It will not make Spawn invulnerable, but can protect him for a short time.

The Necroshield emits an unearthly green glow that has the added side-effect of revealing secrets hidden by arcane means. In certain areas of the world, activating the Necroshield will activate hidden sigils, revealing hidden areas. Open these areas as you would open a door.

ITEMS

There are a number of different items that Spawn can pick up in the game. Most are automatically picked up by his Chains, but Spawn will have to collect others himself.

Items are dropped by defeated enemies, or can be found inside destructible objects. Some are simply found in hidden corners of the city.

Keep a look out for the following items:

AMMUNITION

WEAPON

SOUL

HEALTH

NECROPLASM

COMIC BOOK COVER

MECHANICS

Master these moves to keep Spawn alive.

GLIDING

Getting from rooftop to rooftop is no easy task for a mortal, but Spawn can accomplish it with ease, by using his cape to catch the air and glide. Simply jump into the air and hold the jump button to extend the cape into a gliding wing.

CHAIN GRAPPLE

While the Chains in Spawn's living suit can be a lethal weapon, they can also be used to propel Spawn up to higher platforms. To propel Spawn, press the L1 button when near a grapple point, shown by the Chain Icons. The Chains automatically attach to the grapple point and pull Spawn over to it.

WALL JUMP

In areas where Spawn cannot use his Chains to pull himself up, he can jump between walls. Where you see two walls close together, it is likely that a Wall Jump will be possible.

Stand at the base of one of the walls and press the  button to jump up - Spawn will automatically grab onto a wall with his powerful claws. He will eventually let go, but press the jump button again before he does and he will jump higher and higher. Continue jumping, and Spawn will climb up.

CHARACTERS

There are a number of different characters that Spawn meets throughout the game. The story revolves around the following major characters.

MAMMON™

Mammon is one of Spawn's guides and mentors. Or is he? His motives are unclear to Spawn, who isn't sure whether or not he can wholly trust this suave character. However, Mammon is extremely knowledgeable, and Spawn can and will use this to his advantage.

Mammon keeps a low profile when he isn't talking with Spawn, preferring to let Spawn act for him. He wears many faces, but

usually prefers to exhibit the air of a well-mannered and intelligent gentleman.

MALEBOLGIA®

Hell has many levels, each suited to a particular kind of torment. Level Eight is governed by Malebolgia, one of the many demon lords of Hell, whose task is to prepare an army to take on the forces of Heaven in the final battle on the fields of Armageddon. A cruel and sadistic master, Malebolgia delights in hand crafting the torments of the Souls sent down to him from the world of the living.

Every four hundred years, Malebolgia picks one Soul that stands out above the rest as a leader. He offers that Soul a deal – one that the unsuspecting fool cannot resist, even though it will condemn him to serve Malebolgia forever. That Soul returns to Earth temporarily, to train for its role in the final battle – as a general of Hell's army.

The latest Spawn was a man named Al Simmons.

CHARACTERS

VIOLATOR®

Violator is a greater demon who is very high in the eyes of Malebolgia.

Violator believes that he is the perfect choice to lead Malebolgia's army, but his master prefers generals chosen from the Souls of mankind, and Violator's bitter jealousy of Spawn has brought them together on many occasions.

Now, Violator is aware that time is running out. He ventures out onto the surface to prove his mastery over Spawn once and for all.

ENEMIES

The game is filled with demons and angels with different powers and weaknesses. If Spawn can exploit their weaknesses, they become much easier to defeat. Here is a sampling of the different creatures that Spawn will encounter:

IMP

Imps are foolish, bullying demons who are arrogant when found in packs but weak and cowardly alone. They hunt in great numbers, cackling insanely at the thought of killing and destroying.

ANGEL WARRIOR

These are mid-ranked Angels who have survived several missions in hostile territory. This has a tendency to make young Angels cocky and brash. Only if they can control their ego will they advance to the higher ranks – otherwise they will get themselves killed in the field.

ENEMIES

WHIP DEMON

Whip Demons are tall female greater demons, personifications of malice, taking glee in the despair of others. They thrive on death, and bring death to all who meet them.

GUARDIAN DEMON

When demons hunt in packs, they are often accompanied by these Guardians, which trap their prey in the hunting zone so that they can be tormented at the demons' leisure.

A Guardian Demon's hard shell protects it from any attack and it opens only when the psychic link with the companion demons is broken.
